Preface

This curriculum standard for the Mobile Crane Operator 1 trade program is based upon the on-the-job performance objectives, located in the industry-approved training standard.

The curriculum is organized into 4 levels of training. The Reportable Subjects Summary chart (located on page 5, 29, 41) summarizes the training hours for each reportable subject.

The curriculum identifies the learning that takes place in-school. The in-school program focuses primarily on the theoretical knowledge and the essential skills required to support the performance objectives of the Apprenticeship Training Standards.

Employers/Sponsors are expected to extend the apprentice's knowledge and skills through practical training on a work site. Regular evaluations of the apprentice's knowledge and skills are conducted throughout training to verify that all apprentices have achieved the learning outcomes identified in the curriculum standard.

It is not the intent of the in-school curriculum to perfect on-the-job skills. The practical portion of the in-school program is used to reinforce theoretical knowledge. Skill training is provided on the job.

Pre-requisites

In order to advance to Level 2 of the apprenticeship program, an individual must have completed all of the units outlined in Level 1. Similarly, in order to advance to Level 3 of the program, an individual must have completed all of the units outlined in Level 1 and 2.

Hours Disclaimer (if applicable)

It is agreed that Training Delivery Agents (TDAs) may need to make slight adjustments (with cause) according to particular apprentice needs and may deviate from the unit sequencing and the prescribed practical and theoretical hours shown within the standard. However, all TDAs will comply with the hours at the reportable subject level.

*Please note that all practices described in this standard must be performed

according to the appropriate trade and industry best practice.*

Introduction

This new curriculum standard for the Mobile & Tower Crane Operator trade is designed from the learning outcomes, which were developed from the industry-approved training standard.

The curriculum is organized into a common core for 339A, B and C, three additional levels for Mobile Crane Operator Branch 339A and two additional levels for Tower Crane Operator 339B. Each includes reportable subjects containing learning outcomes to reflect the units of the training standard. Depending on the trade code, specific curriculum standards are to be used. Mobile Crane 339C requires the use of Level 1 Common Core only. Mobile Crane 339A requires the use of Level 1, Common Core, and the Mobile Crane 339A curriculum combining Levels 2, 3 and 4. For Tower Crane 339B the Level 1, Common Core and the Tower Crane Level 2 and 3, combined curriculum is to be used. The hour chart indicates how the curriculum can be delivered in the current block-release format and summarizes the hours of training for each reportable by level.

The reportable subjects are cross-referenced to the training standard for ease of comparison.

Each reportable subject and learning outcome identifies a recommended number of training hours. This hour allotment is broken into hours for instruction in theory and practical application. The division of the curriculum into reportable subjects follows a natural progression of learning through the training program. This structure will allow training centres and apprentices flexibility in program delivery while still observing the importance of sequencing learning in a logical progression.

The curriculum is framed by and includes specific references to terminal performance objectives in the Apprenticeship Training Standards for the Mobile & Tower Crane Operator trade. However, the curriculum identifies only the learning that takes place off the job, in a training environment. The in-school program focuses primarily on the theoretical knowledge required to master the performance objectives of the Training Standards. Employers are expected to extend the apprentice's knowledge and skills through appropriate practical training on the work site. Regular evaluations of an apprentice's knowledge and skills are conducted throughout training to ensure that all apprentices have achieved the learning outcomes identified in the curriculum standard. The balance between theoretical and practical evaluation is identified for each unit of learning outcomes.

Level 2

Number	Reportable Subjects	Hours Total	Hours Theory	Hours Practical
S0309	Lift planning – hydraulic cranes	12	5	7
S0310	Hydraulic crane operations	28	4	24
S0311	Lift planning – conventional cranes	12	5	7
S0312	Conventional crane operations	28	4	24
	Total	80	18	62

Reportable Subject Summary

Number:	S0309		
Title:	Lift planning – Hy	draulic cranes	
Duration:	Total Hours: 12	Theory: 5	Practical: 7
Prerequisites: Co-requisites:	Level 1 N/A		
1.1 Site asses	ssment		

	1 Total Hour	Theory: 0.5 hour	Practical: 0.5 hour
1.2	Crane lifting cap	pacity	
	0.5 Total Hour	Theory: 0.5 hour	Practical: 0 hour
1.3	Load/capacity c	harts	
	10.5 Total Hours	Theory: 4 hours	Practical: 6.5 hours

Evaluation structure:

Knowledge and the application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Equipment requirements:

Mobile hydraulic crane

Number:	1.1
Title:	Site assessment
Duration:	Total Hours: 1 Theory: 0.5 Practical: 0.5
Cross Reference	to Training Standards:
Branch 1	5321.2, 5322.1, 5324.1, 5324.4
Branch 2	5330.5, 5333.1, 5333.2, 5333.6, 5335.1, 5335.4, 5336.1

Upon successful completion, the apprentice is able to inspect a work site to ensure a safe and efficient operation, in accordance with a pre-lift plan.

Learning Outcomes

- 1.1.1 Establish the location of the crane giving consideration to:
 - accessibility of site
 - grade of the site
 - soil conditions
 - distance to embankments
 - initial load location
 - load placement
 - overhead obstructions
 - distance to electrical power lines
 - known underground hazards
 - weather conditions
 - other potential hazards
- 1.1.2 Determine blocking/donnage to be used according to soil conditions
- 1.1.3 Determine the requirement for communications, signallers, flag persons, barriers, grounding and bonding.

Number:	1.2		
Title:	Crane lifting capac	ity	
Duration:	Total Hours: 0.5	Theory: 0.5	Practical: 0
Cross Reference	to Training Standards	:	
Branch 1	5321.3, 5321.4, 532	1.5, 5321.6, 5324.2,	, 5325.3, 5326.3,
Branch 2	5333.4, 5333.5, 533	6.3	

Upon successful completion, the apprentice is able to determine that the lifting capacity of a hydraulic crane is sufficient when considering the configuration and attachments required for a lift.

Learning Outcomes

- 1.2.1 Establish optimum boom configurations (e.g., boom length, boom angle, radius, hook height).
- 1.2.2 Select a configuration appropriate for lifting the load by taking into consideration radius, parts of line, height and the combined weight of the load and rigging for a given crane.
- 1.2.3 Verify that, for a given crane, the configuration is appropriate for the lift.

Number:	1.3		
Title:	Load/capacity cha	rts	
Duration:	Total Hours: 10.5	Theory: 4	Practical: 6.5
Cross Reference	to Training Standards	5:	
Branch 1	5321.1, 5321.6		

Upon successful completion, the apprentice is able to use a hydraulic crane load/ capacity chart to determine the gross capacity for basic applications.

Learning Outcomes

- 1.3.1 State the elements of a load/capacity chart to include:
 - boom length
 - boom angle
 - attachments
 - radius
 - quadrant
 - weight of the load
 - weight of the rigging
- 1.3.2 Locate the specific information from a load/capacity chart.
- 1.3.3 Determine, given the load/capacity technical data and lift information, whether the lift can be done within manufacturers' specifications.

Duration:	Total Hours: 2	Theory: 0.5	Practical: 1.5
Cross Reference	e to Training Standar	rds:	
Branch 1	5319.1		
Branch 2	5331.1		

Upon successful completion, the apprentice is able to apply inspection, setup and operating information from the manufacturers' operator manuals for a given hydraulic crane.

Learning Outcomes

- 2.1.1 Locate specific information in a manufacturers' manual related to the inspection, setup and operation for a given crane.
- 2.1.2 Interpret specific information in a manufacturers' manual related to the inspection, setup and operation for a given crane.

Number:	2.2		
Title:	Pre-operational i	nspections	
Duration:	Total Hours: 3	Theory: 0.5	Practical: 2.5
Cross Reference	e to Training Standar	ds:	
Branch 1			

Upon successful completion, the apprentice is able to safely and efficiently perform a preoperational inspection of a hydraulic crane, in accordance with manufacturers' recommendations, Occupational Health and Safety Act (OHSA) and Training Delivery Agent (TDA).

Learning Outcomes

- 2.2.1 State the recommended sequence of inspection.
- 2.2.2 Verify that the operator aids for the given crane are in place.
- 2.2.3 Confirm that all pertinent inspection reports are completed and filed, according to OHSA and TDA.
- 2.2.4 Confirm that all safety and emergency devices are in place and operational.
- 2.2.5 Locate all controls and system gauges.
- 2.2.6 Perform a pre-operation inspection for a given crane, according to manufacturers' procedures.
- 2.2.7 Perform a function test on the hoist system.
- 2.2.8 Perform basic repairs and maintenance.
- 2.2.9 Report any defects or deficiencies to the supervisor.
- 2.2.10 Record any defects or deficiencies in the crane log book.
- 2.2.11 Record all repairs or maintenance in the appropriate crane log book.

Number:	2.3			
Title:	Pre-operational setup			
Duration:	Total Hours: 3 Theory: 0.5 Practical: 2.5			
Cross Referenc	Cross Reference to Training Standards:

Branch 2	5335.1, 5335.3			

Upon successful completion, the apprentice is able to set up a given hydraulic crane, in accordance with the manufacturers' recommendations.

Learning Outcomes

- 2.3.1 State the setup procedure.
- 2.3.2 Identify overhead obstructions and underground hazards in the lift area.
- 2.3.3 Ensure that the blocking/donnage is sufficient when considering load requirements and surface conditions.
- 2.3.4 Program or adjust safety devices, according to manufacturers' recommendations.

Number:	2.4
Title:	Hoisting techniques
Duration:	Total Hours: 8 Theory: 1 Practical: 7
Cross Reference	ce to Training Standards:
Branch 1	5319.2, 5319.3, 5319.4, 5319.5, 5319.6, 5319.7, 5319.8, 5319.9, 5319.12, 5319.13, 5319.14, 5319.16, 5319.17, 5319.18, 5319.19, 5319.20, 5319.21
Branch 2	5330.4, 5331.2, 5331.3, 5331.4, 5331.5, 5331.6, 5331.7, 5331.8, 5331.9, 5331.10, 5331.13, 5331.14, 5335.3, 5335.5, 5335.6, 5335.7, 5336.1

Upon successful completion, the apprentice is able to perform basic hoisting operations using a hydraulic crane in a safe and efficient manner, in accordance manufacturers' recommendations.

Learning Outcomes

- 2.4.1 Operate a hydraulic crane with and without a load by:
 - booming up/down
 - telescoping in/out
 - slewing clockwise and counterclockwise
 - hoisting up and down
- 2.4.2 Maintain control of the hook block in a safe manner through all functions.
- 2.4.3 Describe pick and carry procedure.
- 2.4.4 Perform a pick and carry lift.

2.5		
Operate hydraulic	crane	
Total Hours: 10	Theory: 1	Practical: 9
e to Training Standards	5:	
5335.2, 5336.12, 53	336.13	
	Operate hydraulic Total Hours: 10 to Training Standards	Operate hydraulic crane

Upon successful completion, the apprentice is able to lift a given load using a hydraulic crane, in accordance with the lift instructions and the manufacturers' recommendations.

Learning Outcomes

- 2.5.1 Assess the lift site.
- 2.5.2 Plan the lift.
- 2.5.3 Perform a pre-operational inspection of the crane.
- 2.5.4 Set up the crane.
- 2.5.5 Rig the load.
- 2.5.6 Hoist the load.
- 2.5.7 Monitor equipment performance.
- 2.5.8 Troubleshoot equipment problems.
- 2.5.9 Move the load to the intended destination.
- 2.5.10 Perform a post-operational procedure.

Number:	2.6		
Title:	Leave crane una	attended	
Duration:	Total Hours: 2	Theory: 0.5	Practical: 1.5
Cross Reference to Training Standards:			
Branch 1	5318.10, 5318.11	1	

Upon successful completion, the apprentice is able to prepare a hydraulic crane to be left unattended for short or long periods of time, in accordance with manufacturers' recommendations.

Learning Outcomes

- 2.6.1 State the procedure for leaving a hydraulic crane unattended for short periods of time (e.g., lunch breaks).
- 2.6.2 State the procedure for leaving a hydraulic crane unattended for long periods of time (e.g., overnight, weekends).
- 2.6.3 Perform shutdown procedure, including:
 - clean wheels/tracks and attachments
 - park equipment in appropriate location
 - shut down and secure equipment
 - perform housekeeping tasks
 - conduct post-operational inspection

Branch 2	5330.5, 5333.1, 5333.2, 5333.6, 5335.1, 5335.4, 5336.13

Upon successful completion, the apprentice is able to inspect a work site to ensure a safe and efficient conventional crane operation, in accordance with a pre-lift plan.

Learning Outcomes

- 3.1.1 Establish the location of the crane by giving consideration to:
 - · accessibility of site
 - grade of the site
 - soil conditions
 - distance to embankments
 - initial load location
 - load placement
 - overhead obstructions
 - distance to electrical power lines
 - known underground hazards
 - weather conditions
 - other potential hazards
- 3.1.2 Determine blocking/donnage to be used according to soil conditions.
- 3.1.3 Determine the requirement for communications, signallers, flag persons, barriers, grounding and bonding.

Upon successful completion, the apprentice is able to safely and efficiently perform a preoperational inspection on a conventional crane, in accordance with manufacturers' recommendations, Occupational Health and Safety Act (OHSA) and Training Delivery Agent (TDA)

Learning Outcomes

Upon successful completion, the apprentice is able to:

- 4.2.1 State the recommended sequence of inspection.
- 4.2.2 Verify that operator aids for the given crane are in place.
- 4.2.3 Confirm that all pertinent inspection reports are completed and filed, according to OHSA and TDA.
- 4.2.4 Confirm that all safety and emergency devices are in place and operational.
- 4.2.5 Locate all controls and system gauges.
- 4.2.6 Perform a pre-operation inspection for a given crane, according to manufacturers' procedures.
- 4.2.7 Perform a function test on the hoist system.
- 4.2.8 Perform basic repairs and maintenance.
- 4.2.9 Report any defects or deficiencies to the supervisor.
- 4.2.10 Record any defects or deficiencies in the crane log book.
- 4.2.11 Record all repairs or maintenance in the appropriate crane log book.

Upon successful completion, the apprentice is able to prepare a conventional crane to be left unattended for short or long periods of time, in accordance with manufacturers' recommendations.

Learning Outcomes

- 4.6.1 State the procedure for leaving a conventional crane unattended for short periods of time (e.g., lunch breaks).
- 4.6.2 State the procedure for leaving a conventional crane unattended for long periods of time (e.g., overnight, weekends).
- 4.6.3 Perform shutdown procedure, including:
 - clean wheels/tracks and attachments
 - park equipment in an appropriate location
 - shut down and secure equipment
 - perform housekeeping tasks
 - conduct post-operational inspection

Level 3

Number	Reportable Subjects	Hours Total	Hours Theory	Hours Practical
S0313	Lift planning – hydraulic cranes	8	5	3
S0314	Hydraulic crane operations	32	2	30
S0315	Lift planning – conventional cranes	8	5	3
S0316	Conventional crane operations	32	2	30
	Total	80	14	66

Reportable Subject Summary-Level 3

Mobile Crane Operator - Branch 1 (339A) - Level 3 - Advanced Hoisting Applications

Number:	S0313		
Title:	Lift planning – Hydraulic cranes		
Duration:	Total Hours: 8	Theory: 5	Practical: 3
Prerequisites:	Branch 1 - Level 2	2	
Co-requisites:	N/A		
.1 Crane lifting capacity			

	1 Total Hour	Theory: 0.5 hour	Practical: 0.5 hour
1.2	Load/ capacity charts		
	7 Total Hours	Theory: 4.5 hours	Practical: 2.5 hours

Evaluation structure:

Knowledge and the application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Equipment requirements:

Mobile hydraulic crane

Number:	1.1		
Title:	Crane lifting capacity		
Duration:	Total Hours: 1	Theory: 0.5	Practical: 0.5
Cross Reference to Training Standards:			
Branch 1	5321.3, 5321.4, 5321.5, 5321.6, 5324.2, 5325.3, 5326.3		
Branch 2	5333.4, 5333.5, 5	336.3	

Upon successful completion, the apprentice is able to determine that the lifting capacity of a hydraulic crane is sufficient, considering the configuration and attachments required for a given complex lift.

Learning Outcomes

- 1.1.1 Establish optimum boom configurations (e.g., boom length, boom angle, radius, hook height).
- 1.1.2 Select a configuration appropriate for lifting the load taking into consideration radius, parts of line, height and the combined weight of the load and rigging.
- 1.1.3 Verify that, for a given crane, the configuration is appropriate for the lift.

Number:	1.2		
Title:	Load/capacity cl	narts	
Duration:	Total Hours: 7	Theory: 4.5	Practical: 2.5
Cross Reference to Training Standards:			
Branch 1	5321.1, 5321.6		

Upon successful completion, the apprentice is able to use a hydraulic crane load/capacity chart to determine the gross capacity for advanced applications, in accordance with manufacturers' specifications.

Learning Outcomes

- 1.2.1 State the elements of a load/capacity chart, including:
 - boom length
 - boom angle
 - attachments
 - radius
 - quadrant
 - weight of the load
 - weight of the rigging
- 1.2.2 Locate the specific information from a load/capacity chart.
- 1.2.3 Determine, given the load/capacity technical data and lift information, whether the lift can be done within manufacturers' specifications.

Number:	S0314		
Title:	Hydraulic crane o	perations	
Duration:	Total Hours: 32	Theory: 2	Practical: 30
Prerequisites:	Branch 1 - Level 2		
Co-requisites:	N/A		

2.1 Operate hydraulic crane

32 Total Hours Theory: 2 hours Practical: 30 hours

Evaluation structure:

Knowledge and the application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Manufacturers' manuals Occupational Health and Safety Act (OHSA) Training Delivery Agent (TDA) policies

Equipment requirements:

Mobile hydraulic crane

Number:	2.1		
Title:	Operate hydrauli	c crane	
Duration:	Total Hours: 32	Theory: 2	Practical: 30
Cross Reference	e to Training Standar	ds:	
Branch 2	5335.2, 5336.12, 5	5336.13	

Upon successful completion, the apprentice is able to perform a complex lift using a hydraulic crane, in accordance with the lift instructions and the manufacturers' recommendations.

Learning Outcomes

- 2.1.1 Assess the lift site.
- 2.1.2 Plan the lift.
- 2.1.3 Perform a pre-operational inspection of the hydraulic crane.
- 2.1.4 Set up the hydraulic crane.
- 2.1.5 Rig the load.
- 2.1.6 Hoist the load.
- 2.1.7 Monitor equipment performance.
- 2.1.8 Troubleshoot equipment problems.
- 2.1.9 Move the load to the destination.
- 2.1.10 Perform the post-operational procedure.

Number:	S0315		
Title:	Lift planning - Co	onventional cranes	
Duration:	Total Hours: 8	Theory: 5	Practical: 3
Prerequisites:	Branch 1 - Level 2	2	
Co-requisites:	N/A		
3.1 Crane lifting capacity			

J. I	orane mung ca	ipacity		
	1 Total Hour	Th	eory: 0.5 hour	Practical: 0.5 hour
3.2	Load/ capacity	charts		
	7 Total Hours	Theory: 4.5 hou	rs Practical: 2	.5 hours

Evaluation structure:

Knowledge and the application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Equipment requirements:

Mobile conventional crane

Number:	3.1
Title:	Crane lifting capacity
Duration:	Total Hours: 1 Theory: 0.5 Practical: 0.5
Cross Reference	e to Training Standards:
Branch 1	5321.3, 5321.4, 5321.5, 5321.6, 5324.2, 5325.3, 5326.3
Branch 2	5333.4, 5333.5, 5336.3

Upon successful completion, the apprentice is able to determine that the lifting capacity of a conventional crane is sufficient, considering the configuration and attachments required for a given complex lift.

Learning Outcomes

- 3.1.1 Establish optimum boom configurations (e.g., boom length, boom angle, radius, hook height).
- 3.1.2 Select a configuration appropriate for lifting the load when taking into consideration radius, parts of line, height and the combined weight of the load and rigging.
- 3.1.3 Verify that, for a given crane, the configuration is appropriate for the lift.

Number:	3.2			
Title:	Load/capacity ch	arts		
Duration:	Total Hours: 7	Theory: 4.5	Practical: 2.5	
Cross Reference to Training Standards:				
Branch 1	5321.1, 5321.6			

Upon successful completion, the apprentice is able to use a conventional crane load/capacity chart to determine the gross capacity for advanced applications.

Learning Outcomes

- 3.2.1 State the elements of a load/capacity chart, including:
 - boom length
 - boom angle
 - attachments
 - radius
 - quadrant
 - weight of the load
 - weight of the rigging
- 3.2.2 Locate the specific information from a load/capacity chart.
- 3.2.3 Determine, given the load/capacity technical data and lift information, whether the lift can be done within manufacturers' specifications.

Number:	S0316		
Title:	Conventional cra	ne operations	
Duration:	Total Hours: 32	Theory: 2	Practical: 30
Prerequisites:	Branch 1 - Level 2	<u>)</u>	
Co-requisites:	N/A		
4.1 Operate conventional crane			

32 Total Hours Theory: 2 hours Practical: 30 hours

Evaluation structure:

Knowledge and the application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Manufacturers' manuals Occupational Health and Safety Act (OHSA) Training Delivery Agent (TDA) policies

Equipment requirements:

Mobile conventional crane

Number:	4.1		
Title:	Operate convent	ional crane	
Duration:	Total Hours: 32	Theory: 2	Practical: 30
Cross Reference	e to Training Standar	ds:	
Branch 1	5326.1,		
Branch 2	5335.2, 5336.12, 5	5336.13	

Upon successful completion, the apprentice is able to perform a complex lift using a conventional crane, in accordance with the lift instructions and the manufacturers' recommendations.

Learning Outcomes

- 4.1.1 Assess the lift site.
- 4.1.2 Plan the lift.
- 4.1.3 Perform a pre-operational inspection of the conventional crane.
- 4.1.4 Set up the conventional crane.
- 4.1.5 Rig the load.
- 4.1.6 Hoist the load.
- 4.1.7 Monitor equipment performance.
- 4.1.8 Troubleshoot equipment problems.
- 4.1.9 Move the load to the destination.
- 4.1.10 Perform the post-operational procedure.

	40 Total Hours	Theory: 20 hours	Practical: 20 hours		
1.8	Water lift				
	2 Total Hours	Theory: 2 hours	Practical: 0 hour		

Evaluation structure:

Knowledge of all aspects of mobile crane operations is evaluated by theory testing. The application of safe working practices will be monitored throughout the training and considered during practical evaluations.

Learning reference material:

Manufacturers' manuals Occupational Health and Safety Act (OHSA)

Equipment requirements:

Number: Title:	1.1 Elevated work pl	latform	
Duration:	Total Hours: 6	Theory: 2	Practical: 4
Cross Reference	to Training Standa	rds:	
Branch 1	5325.11, 5326.9,	5326.10	
Branch 2	5336.10, 5336.11		

Upon successful completion, the apprentice is able to operate an elevated work platform in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.1.1 Describe the operating procedure with an elevated work platform.
- 1.1.2 Assess the lift site.
- 1.1.3 Plan the lift.
- 1.1.4 Attach the elevated work platform.
- 1.1.5 Perform a pre-operational inspection of the crane.
- 1.1.6 Set up the crane.
- 1.1.7 Hoist the elevated work platform.
- 1.1.8 Monitor equipment performance.
- 1.1.9 Troubleshoot equipment problems.
- 1.1.10 Move the platform to the intended destination.
- 1.1.11 Perform the post-operational procedure.

Number:	1.2		
Title:	Engineered lift		
Duration:	Total Hours: 6	Theory: 2	Practical: 4
Cross Reference	e to Training Standar	rds:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform an engineered lift in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.2.1 Describe the procedure for an engineered lift.
- 1.2.2 Assess the lift site.
- 1.2.3 Plan the lift.
- 1.2.4 Perform a pre-operational inspection of the crane.
- 1.2.5 Set up the crane.
- 1.2.6 Rig the load.
- 1.2.7 Perform the engineered lift.
- 1.2.8 Monitor equipment performance.
- 1.2.9 Troubleshoot equipment problems.
- 1.2.10 Move the load to the intended destination.
- 1.2.11 Perform the post-operational procedure.

Number:	1.3		
Title:	Precision lift		
Duration:	Total Hours: 12	Theory: 4	Practical: 8
Cross Reference	to Training Standard	ls:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform a precision lift in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.3.1 Describe the procedure for a precision lift.
- 1.3.2 Assess the lift site.
- 1.3.3 Plan the lift.
- 1.3.4 Perform a pre-operational inspection of the crane.
- 1.3.5 Set up the crane.
- 1.3.6 Rig the load.
- 1.3.7 Perform the precision lift.
- 1.3.8 Monitor equipment performance.
- 1.3.9 Troubleshoot equipment problems.
- 1.3.10 Move the load to the intended destination.
- 1.3.11 Perform the post-operational procedure.

Number:	1.4		
Title:	Heavy lift		
Duration:	Total Hours: 6	Theory: 2	Practical: 4
Cross Reference	e to Training Standa	rds:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform a heavy lift in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.4.1 Describe the procedure for a heavy lift.
- 1.4.2 Assess the lift site.
- 1.4.3 Plan the lift.
- 1.4.4 Perform a pre-operational inspection of the crane.
- 1.4.5 Set up the crane.
- 1.4.6 Rig the load.
- 1.4.7 Perform the heavy lift.
- 1.4.8 Monitor equipment performance.
- 1.4.9 Troubleshoot equipment problems.
- 1.4.10 Move the heavy load to the intended destination.
- 1.4.11 Perform the post-operational procedure.

Number:	1.5		
Title:	Dragline and cla	m operations	
Duration:	Total Hours: 4	Theory: 3	Practical: 1
Cross Referen	ce to Training Standa	rds:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform dragline and clam operations in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.5.1 Describe the procedure for dragline and clam operations.
- 1.5.2 Describe the crane configuration for dragline and clam operations.
- 1.5.3 Describe considerations when working from a land-based worksite.
- 1.5.4 Describe considerations when working from a floating platform.
- 1.5.5 State post-operational procedure.

Number:	1.6		
Title:	Foundation and	shoring operat	ions
Duration:	Total Hours: 4	Theory: 3	Practical: 1
Cross Reference	e to Training Standa	ırds:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform foundation and shoring operations in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.6.1 Describe foundation and shoring structures and attachments, including:
 - drilling unit
 - pile driving unit
 - extraction unit
- 1.6.2 Describe the procedure for foundation and shoring operations.
- 1.6.3 Describe considerations for operating at a worksite.
- 1.6.4 State post-operational procedure.

Number:	1.7		
Title:	Multiple crane lift		
Duration:	Total Hours: 40	Theory: 20	Practical: 20
Cross Reference	e to Training Standard	ds:	
Branch 1	5325.9, 5326.9		
Branch 2	5336.10		

Upon successful completion, the apprentice is able to perform a multiple crane lift in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.7.1 Calculate the load on each crane during a multiple crane lift.
- 1.7.2 Describe the procedure for a multiple crane lift.
- 1.7.3 Assess the lift site.
- 1.7.4 Plan a variety of lifts, such as:
 - standing up a horizontal object
 - laying down a vertical object
 - lifting a slab
- 1.7.5 Perform a pre-operational inspection of the cranes.
- 1.7.6 Set up the cranes.
- 1.7.7 Rig the load.
- 1.7.8 Perform the lift.
- 1.7.9 Monitor equipment performance.
- 1.7.10 Troubleshoot equipment problems.
- 1.7.11 Move the load to the intended destination.
- 1.7.12 Perform the post-operational procedure.

5336.10		
	Vater lift ^T otal Hours: 2 Training Standards 5326.9	Vater lift Total Hours: 2 Theory: 2 Training Standards: 5326.9

Upon successful completion, the apprentice is able to perform a lift of an object in or out of water in a safe and efficient manner, in accordance with the lift instructions, manufacturers' recommendations and Occupational Health and Safety Act (OHSA).

Learning Outcomes

- 1.8.1 Describe the procedure for a water lift.
- 1.8.2 Assess the lift site.
- 1.8.3 Plan the lift.
- 1.8.4 Perform a pre-operational inspection of the crane.
- 1.8.5 Set up the crane.
- 1.8.6 Rig the load.
- 1.8.7 Perform the lift (real or simulated).
- 1.8.8 Monitor equipment performance.
- 1.8.9 Troubleshoot equipment problems.
- 1.8.10 Move the load to the intended destination.
- 1.8.11 Perform the post-operational procedure.
